

Title: Introduction to Machine Learning

Machine learning is a subset of artificial intelligence that focuses on building systems that learn from data.

There are three main types of machine learning:

1. Supervised learning
2. Unsupervised learning
3. Reinforcement learning

Supervised learning uses labeled data to train models.

Unsupervised learning finds patterns in unlabeled data.

Reinforcement learning learns through rewards and penalties.

Key applications include:

- Image recognition
- Natural language processing
- Recommendation systems

Conclusion:

Machine learning is widely used in modern technology and continues to grow rapidly.
